

CordenPharma Caponago

Drug Product Facility

CordenPharma Caponago (IT) is a cGMP manufacturer of a wide range of sterile liquid dosage forms for injectable use, with specialized expertise in lipid nanoparticle (LNP) formulation, terminal sterilization, aseptic fill & finish and sterile emulsion technology. The site has a full range of capabilities including an R&D lab for GMP development, formulation development, manufacturing, clinical trials management, packaging & pharma logistics.

As a former AstraZeneca site acquired by CordenPharma in 2009, Corden Pharma Caponago S.p.A. provides access to over 20 years of experience in injectable drug product manufacturing. The site is fully inspected by global regulatory agencies including, but not limited to, EMA (AIFA), FDA, ANVISA, TGA, and PMDA.

Drug Products:

Sterile Liquids
Sterile Powder Lyo Vials
LNP Formulation
Drug Product Support Services
Pharma Packaging & Logistics

Integrated Supply API

Facilities:

CordenPharma Bergamo (IT)
CordenPharma Brussels (BE)
CordenPharma Chenôve (FR)
CordenPharma Colorado (US)
CordenPharma Frankfurt (DE)
CordenPharma Liestal (CH)

Related Technology Platform:

Injectables

Caponago Facility Facts

Core Capabilities

- Contract development & manufacturing expertise for Sterile Liquids & Lyophilized Solids
- Lipid Nanoparticle (LNP) formulation development and GMP manufacturing capabilities
- Full range of services including Formulation Development, Analytical Development, Clinical Program Support, Commercial Manufacturing
- Wide range of Injectable Drug Product formats (Ampoules, Vials, Pre-filled Syringes (PFS) & Cartridges)
- Capability & compliance to sustain Aseptic Fill & Finish or Terminally Sterilized Injectables
- Expertise formulating Small Molecule Entities, complex Peptides, Oligonucleotides & Biologics

Capacities / Technologies

- Terminal Sterilization Fill & Finish
- Clinical & Commercial Aseptic Fill & Finish
- Broad & differentiated packaging capacity (5 lines) supporting all TS & Aseptic ranges
- Chemical & microbiological testing capability
- Storage available at differentiated temperatures (25°C \ 8 - 2°C \ -20°C \ -70°C)
- Logistics & distribution (both for clinical trials or commercially-approved drugs)
