

CordenPharma Chenôve

API Facility

Colorado

CordenPharma Chenôve (FR) is a cGMP manufacturer of advanced pharmaceutical intermediates and APIs, specializing in synthetic route design and development of regular small molecule candidates. Located in the Burgundy region of Central–Eastern France, the facility was started in 1960 by MSD before being purchased by Fournier Laboratories in 1985. Formerly called Synkem, the facility was acquired by CordenPharma in 2008.

CordenPharma Chenôve brings over 50 years of experience and expertise in the pharmaceutical manufacturing arena focusing on chemistry, technology and project management, and is fully inspected by global regulatory agencies including, but not limited to, EMA, FDA and PMDA.

APIs:

Clinical & Commercial
API Support Services
Centre of Excellence for Flow
Chemistry
SFC Purification

Integrated Supply Drug

Product Facilities:

CordenPharma Caponago (IT)
CordenPharma Ettingen (CH)
CordenPharma Fribourg (CH)
CordenPharma Lisbon (PT)
CordenPharma Plankstadt (DE)

Related Technology Platform:

Small
Molecules

Lipids &
Carbohydrates

Chenôve Facility Facts

Core Capabilities

- Manufacture of APIs & Advanced GMP Intermediates from kilo-scale to metric tonnes
- Flexible, multi-purpose manufacturing plants with reactors up to 6,250 L
- On-site, comprehensive analytical development & QC facilities
- Extensive purification capabilities via SFC
- Experience handling a wide range of chemical reactions
- CordenPharma Centre of Excellence in Flow Chemistry & Continuous API Manufacture

Capacities / Technologies

- Reactors from 25 L to 6,250 L (Total Capacity – 60,000 L)
- Materials of construction: stainless steel, glass-lined & Hastelloy
- Reactions conditions: -10°C to 120°C
- Dryers: vacuum tray & conical
